RE: Final Approval of Subsurface Water Quality
Q.A./Q.C. Plan for Dump Leach #3; and
Minor Modification of Ground Water
Quality Discharge Permit No. UGW450001.

Dear Mr. Eurick:

We have reviewed your revised ground water sampling plan dated October 22, 1991. ²

This letter constitutes final approval of the plan, based on the condition that all ground water samples will be filtered in the field for dissolved analysis, unless ground water turbidity at the time of collection is equal to or less than 5 NTU; at which time Barrick may conduct only total analysis, at their discretion.

As per Part I H(1) of the permit this approved plan has now become Appendix A of the permit, please see the attached pages.

We have also corrected several typographic errors that you brought to our attention in your August 1, 1990 letter. In addition to these errors, we have also corrected other typographical errors found in Part I D 5, Part I E 7(c)(2), Part I F(1)(b), Part I G 1, Part I G 3(a), Part I H 3(e), Part I H 5, and Part I H 5(c). All the corrected pages are attached for your use; please add them to your permit in order to ensure continued compliance.

Mr. Glen Eurick
